

My School Loo - Hygieneaufklärung mit der GTO

2017 hat die GTO ihr Aufklärungspaket „My School Loo“ überarbeitet und erweitert. Die Überarbeitungen beinhalteten Designanpassungen sowie die Hervorhebung der Bedeutung von Handwasmöglichkeiten und von Putz- und Wartungspersonal.

Introduction

MY SCHOOL LOO

One thing unites all children, men and women around the world. We need to go to the loo... day after day... and we all want to have a nice loo!

But loos need to be clean and safe too. Why? In our loos we find tiny living things. We call them bacteria, viruses, worms or simply just germs. Some of these germs are dangerous and they make us sick.

These germs are tricky, because they are so tiny we cannot see them. They spread from loos to other children through dirty hands, messy playgrounds, or even through flies!

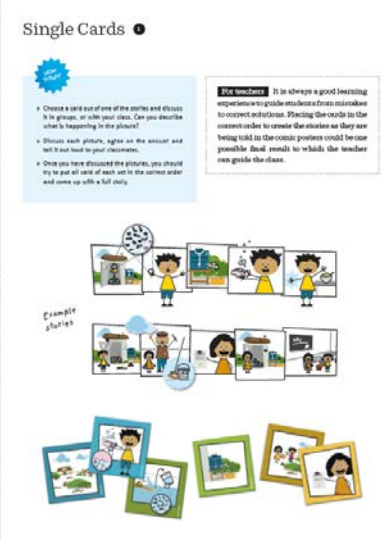

It's up to us to keep our loos nice and safe and clean, at home or at school. It needs you, your teacher, your janitor, your principal and your parents. Let's do it together!

So it's up to all of us to keep our environment free from loos and germs, no matter where we are.

You will see, there is a lot to learn. My School Loo will show us, how we can stay healthy and maintain nice and clean loos, together as one.

"Let's open the box and have some fun! The packet will tell you, what's in the box and how the games, comics and materials work."

Single Cards

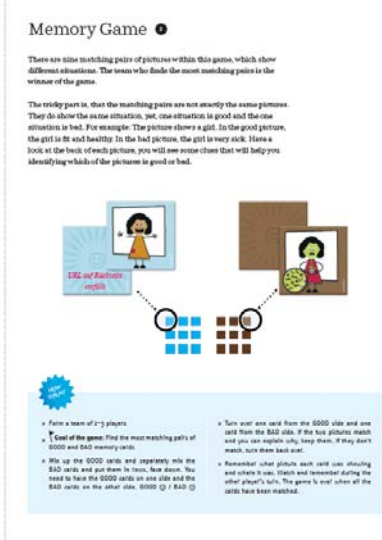

Example starter

- Choose a card out of one of the sets and discuss it to groups, or with your class. Can you describe what is happening in the picture?
- Show each picture, agree on the answer and tell it out loud to your classmates.
- Once you have discussed the pictures, you should try to put all cards of each set in the correct order and come up with a full story.

For teachers It is always a good learning experience to guide students from mistakes to correct solutions. Placing the cards in the correct order to create the stories as they are being told in the comic proteins could be one possible final result to which the teacher can guide the class.

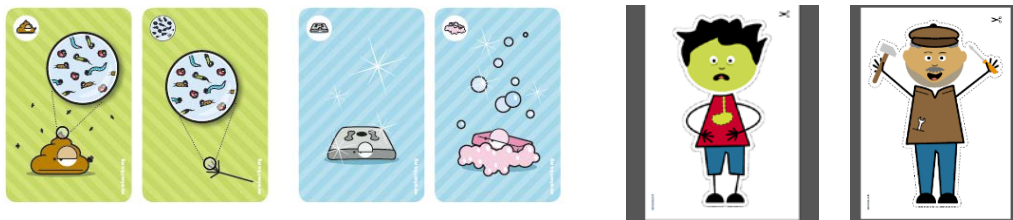

Memory Game

There are nine matching pairs of pictures within this game, which show different situations. The team who finds the most matching pairs is the winner of the game.

The tricky part is, that the matching pairs are not only the same pictures. They do show the same situation, yet one situation is good and the other situation is bad. For example: The picture shows a girl. In the good picture, the girl is fit and healthy. In the bad picture, the girl is very sick. Have a look at the back of each picture, you will see some clues that will help you identifying which of the pictures is good or bad.

- Form a team of 2-3 players.
- Deal of the game: Find the most matching pairs of GOOD and BAD memory cards.
- Mix up the GOOD cards and separately mix the BAD cards and put them in front, face down. You need to have the GOOD cards on one side and the BAD cards on the other side. GOOD (G) / BAD (B).
- Turn over one card from the GOOD side and one card from the BAD side. If the two pictures match and you can explain why, keep them. If they don't match, turn them back over.
- Remember what picture each card was showing and where it was. Which card remember during the other player's turn. The game is over when all the cards have been matched.

GTO-MitarbeiterInnen und EhrenamtlerInnen nutzten die „My School Loo“-Materialien bereits in Projekten im Ausland:

Lesotho

Philippinen

Bei diversen GTO-Schulungen lernen die TeilnehmerInnen spielerisch, wie wichtig ein gutes Klo, sauberes Wasser und Händewaschen mit Seife für die Gesundheit und ein gutes Leben sind. Hier während des GTO-Grundlagenseminars „Hygieneaufklärung in der Entwicklungszusammenarbeit und humanitären Hilfe“:

Die GTO stellte das Basis-Kit auch anderen Organisationen zur Testanwendung zur Verfügung:

Ingenieure ohne Grenzen, Kamerun

SADA, Togo

Technologies for Economic Development (TED), Teachers Training, Lesotho
